### **L&L Products Joins CAMX 2021 and Presents Three New Technology Lines**

L&L Products is exhibiting at CAMX (The Composites and Advanced Materials Expo) October 19 – 21, 2021 in Dallas, Texas, at booth H60.

CAMX is known as the largest, most comprehensive composites and advanced materials event for products, solutions, networking, and advanced industry thinking in the United States.

“It’s been a year filled with many uncertainties, but something favorable that has come out of it is the unique technologies that we’ve been able to release. I’m looking forward to meeting with people in all different industries to share how L&L’s new technology lines can bring outstanding properties to many different composite applications,” Eren Hursit, Sales and Development Manager of L&L Products North America.

Notable technologies expected to be at the L&L Products booth H60 include:

#### **T-Link™**

T-Link™ is an advanced engineering thermoplastic adhesive hybrid resin that does not require refrigeration or special handling and – being highly customizable – can be easily and quickly consolidated into a composite structure.

#### **Continuous Composite Systems™ (CCS™)**

Continuous Composite Systems™ (CCS™) are continuous fiber-reinforced composite materials that can be used as a carrier when combined with our highly engineered sealants and/or structural adhesives. The system is designed to provide strength, stiffness, and rigidity to a lightweight structure. The Composite Tunnel Reinforcement produced with CCS™ was the recent recipient of the Altair Enlighten Award in partnership with BASF and Stellantis.

#### **PHASTER™**

PHASTER™ is a development technology line of L&L’s proprietary two-component ambient curing technologies with superior adhesive performance and unprecedented processing ease, in various environmental conditions. In addition, PHASTER™ is free of known chronic hazards and has inherent flame retardancy to meet the increasingly stringent regulatory requirements.

In addition to L&L’s presence at booth H60, L&L Products team members will be giving presentations on two topics:

L&L Products, Inc.

160 McLean Drive • Romeo • MI 48065 • USA

Tel: +1 (586) 336-1700 • Fax: +1(586) 336-1699 • E-mail: [contact@llproducts.com](mailto:contact@llproducts.com) • Web: [www.llproducts.com](http://www.llproducts.com)

1. *L&L Products Presents: The Game Changer in Ambient Temperature Cured Technology* by Hamid Mortazavian on Tuesday October 19, 2021 10:30am - 11:20am
2. *Go Beyond Limits with L&L Products T-Link™ Technology* by Jason Walker on Wednesday October 20, 2021 10:30am - 10:55am

The abstract submitted for *The Proprietary 2K Ambient Temperature Curing Technology* is a Finalist of the “Unsurpassed Innovation Award” for the 2021 CAMX Award.

For additional new product release information visit the L&L Products website [www.llproducts.com](http://www.llproducts.com).

#### **About L&L Products**

L&L Products is a technology-driven business-to-business company with unique expertise in static sealing, acoustics, bonding, vibration reduction, structural reinforcements, thermal insulation, and composite components for automotive, aerospace, commercial vehicle and other industrial applications. Today, L&L has over 1300 employees worldwide, 16 global locations, and 8 manufacturing facilities. For more information visit [www.llproducts.com](http://www.llproducts.com).

#### **About CAMX**

Created by ACMA and SAMPE, CAMX is widely known as the largest, most comprehensive composites and advanced materials event for products, solutions, networking, and advanced industry thinking.
