

L&L PRODUCTS

APPLIED ENGINEERING & MATERIALS SCIENCE

Driven by Technology.

L&L Products combines expertise in materials science, advanced engineering, and manufacturing process optimization for customers to develop unique solutions that deliver structural reinforcement, substrate bonding, static sealing, acoustic improvement, and structural repair.

The L&L Difference.

For nearly 70 years, our skilled experts have partnered with customers around the world to understand their unique challenges. With these insights and an ever-expanding range of proprietary technologies available to us, we develop validated solutions that result in lighter, stronger, and quieter products and optimized production processes that are simplified, cleaner, and safer.

Our work is rooted in a strong Corporate Purpose: To be a good place for all who touch it, where the quality of work, product, and relationships are a priority. This commitment to our core values enables L&L to foster long-lasting partnerships.

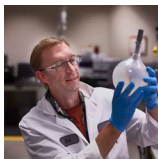

From Molecules to Materials.

High Touch Business Model

Firm understanding of the requirements and challenges of each unique application.

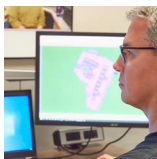

Materials Science

Unique materials to provide solutions in the market.

Material Characterization

Physical testing to validate the performance of our materials.

Modeling & Validation

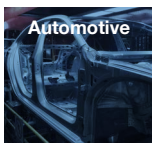

Application and material validation with highly predictive modeling.

Manufacturing Capabilities

Product development support and manufacturing experience.

Innovative Solutions for Nearly Every Industry.

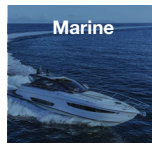

Automotive

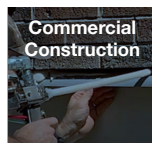

Two-Wheel Transportation

Mass Transportation

Marine

Commercial Construction

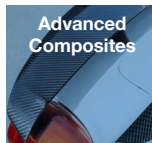

Do-It-Yourself (DIY)

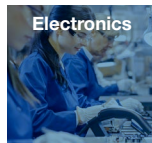

Commercial Vehicles

Sporting Goods

Advanced Composites

Electronics
