How L&L Serves the Commercial Vehicle Market.

- Environmental and safety regulatory compliance
- Pass-by noise regulations (ISO 362)
- Manufacturing for operation in varied environmental conditions
- Weight management to maximize fuel efficiency without impacting structural strength
- Some commercial vehicle manufacturers omit E-coat, resulting in increased susceptibility to corrosion

L&L Acoustic.

Innovative materials that reduce noise, vibration, and harshness (NVH).

L&L Seal.

Reliable sealing systems that guard against water, air, and dust intrusion.

L&L Thermal.

Thermal solutions that protect components and improve temperature control.

L&L Bond.

Strong, lightweight adhesive solutions that streamline assembly and boost durability.

L&L Reinforce.

Structural reinforcements that enhance strength without adding unnecessary weight.
