

CONSTRUCTION & AGRICULTURAL EQUIPMENT

Solutions for Construction & Agricultural Equipment.

L&L Products brings decades of global experience in developing technologies for acoustic optimization, bonding and sealing, lightweighting, and reinforcement. With deep expertise in these areas, L&L builds long-term partnerships through collaboration and a high-touch approach.

How L&L Serves the Construction & Agricultural Equipment Market.

- Compliance with local, national, and international regulations regarding environmental and safety levels
- Manufacturing for operation in varied environmental conditions
- Weight management to maximize fuel efficiency without impacting structural strength
- Ambient temperature bonding and sealing to a variety of substrates

L&L Acoustic.

Innovative materials that reduce noise, vibration, and harshness (NVH) in the cabin.

L&L Bond.

Strong, lightweight adhesive solutions that streamline assembly and boost durability.

L&L Reinforce.

Structural reinforcements that enhance strength without adding unnecessary weight.

L&L Seal.

Reliable sealing systems that guard against water, air, and dust intrusion.

L&L Thermal.

Thermal solutions that protect battery components and improve temperature control in the cabin.
