

# DECI-TEX®

DECI-TEX T-SERIES

**THERMOFORMABLE FIBER  
SOLUTION FOR SOUND  
ABSORPTION.**

The DECI-TEX® platform is a fiber-based technology that yields a broad range of products, all being tunable for customer specific applications.

## HIGHLY COMPACTED, FIBER-BASED NONWOVEN TECHNOLOGY.

DECI-TEX® T-Series is a thermoformable fiber-based solution for acoustic insulation with superior performance. This lightweight material gives shape to the acoustic solution by thermoforming to a 3D part with a unique combination of tunable acoustic performance, weight saving, and recyclability. Typical applications include acoustic-efficient air ducts and hush panels.

DECI-TEX® materials yield high resilience and achieve superior mechanical integrity over other forms of nonwoven insulation.

## KEY PRODUCT ATTRIBUTES

### EXCELLENT PERFORMANCE

High performance acoustic insulation at very low densities and part weights.

### DESIGN FLEXIBILITY

Thermoformed to suit application requirements.

### DURABLE PERFORMANCE

High resilience and achieve superior mechanical integrity over other forms of nonwoven insulation. Water, UV, and fire resistant.\*

*\*Most materials meet FMVSS 302 for flammability at a minimum. Properties and performance will vary.*

## APPLICATIONS

- Air ducts
- Hush panels
- Rear door trim
- Spare wheel compartment
- Side door trim
- Wheel well liners
