

**ENCLOSED, FLATBED, REFRIGERATED,  
AND CURTAINSIDE TRAILERS**

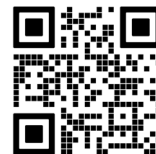

## **Proven Solutions for Semi Trailers.**

L&L Products brings decades of global experience in developing technologies for acoustic optimization, bonding and sealing, lightweighting, and reinforcement. With deep expertise in these areas, L&L builds long-term partnerships through collaboration and a high-touch approach.

## How L&L Serves the Semi Trailer Market.

- Durability and operation in varied environmental and load conditions
- Weight management to maximize fuel efficiency and load capacity without impacting structural strength
- Ambient temperature bonding and sealing to a variety of substrates

*Visit us to learn about how  
L&L Products serves the  
semi trailer market.*

### L&L Bond.

Strong, lightweight adhesive solutions that streamline assembly and boost durability.

### L&L Reinforce.

Structural reinforcements that enhance strength without adding unnecessary weight.

### L&L Seal.

Reliable sealing systems that guard against water, air, and dust intrusion.

### L&L Thermal.

Thermal solutions that protect components and improve temperature control for freight.
