

RAIL EQUIPMENT

Solutions for Rail Equipment.

L&L Products brings decades of global experience in developing technologies for acoustic optimization, bonding and sealing, and reinforcement. From panel bonding with FST-compliant materials to structural and local reinforcement, our technologies enable lightweighting, durability, and enhanced passenger comfort in cabin interiors. L&L builds long-term partnerships through collaboration and a high-touch approach.

How L&L Serves the Rail Equipment Market.

- Ambient temperature bonding and sealing to a variety of substrates
- FST-compliant and DVS 1618/EN 17460 certified adhesives and sealants available
- Manufacturing for operating in varied environmental conditions
- Weight management to maximize fuel efficiency without impacting structural strength

L&L Acoustic.

Innovative materials that reduce noise, vibration, and harshness (NVH) in the cabin.

L&L Bond.

Strong, lightweight adhesive solutions that streamline assembly and boost durability.

L&L Reinforce.

Structural reinforcements that enhance strength without adding unnecessary weight.

L&L Seal.

Reliable sealing systems that guard against water, air, and dust intrusion.

L&L Thermal.

Thermal solutions that protect battery components and improve temperature control in the cabin.
